PROJECTS

POS System — Teleshop | *MongoDB · Express · React · Node.js (MERN)*

- Developed a complete Point-of-Sale system for a telecommunications retail shop.
- Features include product management, invoicing, sales reporting, and inventory tracking.

Inventory Management System | *Python · SQLite*

- Built a desktop inventory management application for a retail shop.
- Implemented stock-in/out tracking, low-stock alerts, and printable reports.

Bus Seat Booking System | [Node.js · MongoDB](#)

- ▶ Designed and delivered a seat reservation and booking system for a private bus company.
- ▶ Supports real-time seat availability updates and booking management.

Vehicle Inspection Management System | [MERN Stack](#)

- ▶ Created a digital vehicle inspection record system for a company.
- ▶ Allows inspection logs, status tracking, and report generation.

EXTRACURRICULAR ACTIVITIES

- ▶ Chess — Competed at school level; achieved 3rd place twice in inter-school tournaments.

AVAILABILITY & WORK PREFERENCE

Available for flexible part-time or remote roles that can be balanced with a full-time undergraduate degree commencing June 2026. Open to freelance projects, junior developer positions, and internships.
